

Kyrylo Polishchuk, Full-Stack Developer

Prague, CZ, +420 773 551 028, kirillpolishchuk02@gmail.com

INTRODUCTION

Full-stack developer with 3+ years of commercial experience across customer portals, e-commerce, energy/utility platforms and internal business systems. Strongest in React/TypeScript and Ruby on Rails, with additional backend experience in PHP/Symfony, Java/Spring Boot, Golang and Node.js ecosystems. Experienced in owning features end-to-end: API design, frontend architecture, background jobs, integrations, PostgreSQL optimization, CI/CD, observability, production debugging and cross-team delivery.

WORK EXPERIENCE

Apr 2025 — Present	Full-Stack Developer, eMan Prague, Czech Republic
	• Projects: E.ON eContracts / PPAS Customer & Self-service portals / Respect Online • Developed React/TypeScript and Ruby on Rails features for production web portals used in energy and insurance domains. • Designed and maintained REST-style APIs, DTO/validation layers, Rails services/use-cases, serialisers/entities and SQL-backed data flows. • Built background processing with Sidekiq and scheduled jobs for SAP/API integrations, reminders, state transitions and data synchronisation. • Resolved complex synchronisation issues, race conditions and edge-case bugs across frontend, backend and integration boundaries. • Implemented new UI modules, refactored legacy code and handled accessibility issues. • Improved observability and stability with Sentry, logs, monitoring dashboards and proactive production debugging. • Support CI/CD, Dockerised development, GitLab workflows, test coverage and code reviews across several teams.
Jul 2023 — Apr 2025	Full-Stack Developer, Enerfis Prague, Czech Republic
	• Projects: Enectiva • Built and maintained a business application with Ruby on Rails, Hotwire/Turbo, Stimulus and Trailblazer for structured backend logic. • Developed Golang microservices with Go kit and integrated them with Rails-backed business workflows. • Optimised PostgreSQL queries, migrations and Redis-backed workflows to improve performance and operational reliability. • Implemented new modules, refactored legacy code and handled debugging of production issues in an Agile delivery environment.
Aug 2024 — Jan 2025	Software Engineer & WebOps, The School Photo Company / AMC PHOTO Inc. New York, USA
	• Maintained and improved customer-facing website, including UI changes, analytics, SEO structure and operational monitoring. • Managed WebOps tasks, performance analysis and content/technical improvements to support traffic growth and reliability.
Feb 2024 — Sep 2024	PHP Full-Stack Developer, Megaknihy Prague, Czech Republic
	• Developed and maintained scalable warehouse and e-commerce modules using PHP, Symfony-style architecture, Twig and JavaScript. • Maintained legacy systems, implemented backend business logic and improved internal support/admin interfaces. • Refactored data-heavy screens and optimised backend services for better maintainability and performance.
Sep 2022 — May 2023	React / Java Full-Stack Developer, FH Solutions
	• Developed e-commerce, finance and education web applications using React and Java Spring Boot with Maven, Tomcat, Hibernate and JPA. • Developed features for production web portals used in energy and insurance domains. • Designed and maintained REST-style APIs and backed data flows. • Resolved complex issues and edge-case bugs across frontend, backend and integration boundaries. • Implemented new UI modules, refactored legacy code and handled accessibility issues.

Sep 2022 — May 2023

- Collaborated with cross-functional teams on feature design, implementation, testing and debugging.
- PHP Developer, CTU** Prague, Czech Republic
- Built and maintained an e-commerce web application using PHP and Vue.js, implementing features from project requirements and fixing application issues.

EDUCATION

Jan 2024 - Present	Czech University of Life Sciences Prague, Faculty of Operational Economics, Informatics (INFO)	Prague
Sep 2021 - Feb 2024	Czech Technical University in Prague, Faculty of Information Technologies, Software Engineering	Prague

TECHNICAL SKILLS

React	TypeScript
JavaScript	Redux
MobX	Vite
HTML5	SCSS/Sass
Tailwind	Stimulus
Hotwire/Turbo	Ruby on Rails
Trailblazer	Node.js
PHP	Symfony
Java Spring Boot	Golang
PostgreSQL / MySQL	Redis
REST APIs	GraphQL basics
Docker	Git
GitLab CI/CD	Sentry
Grafana	Firebase
Legacy refactoring	Documentation

LANGUAGES

English	B2	Czech	B2
Ukrainian	C2	Russian	C2
